Preface

This book is part of a set designed for use in the Early Childhood Programme in Tharaka School District. Its purpose is to prepare young children for reading, by:

- Showing them that books are for enjoyment and information
- Demonstrating that reading is from left to right
- Helping them identify and recognize some individual words within the story
- Encouraging them to think about the meaning of a story
- Helping them learn new vocabulary
- Integrating what they see and hear in the book with a subject (thematic unit) they are studying in class.
- Developing their thinking (critical thinking, prediction, comparison) by asking them questions
- Developing the skill of prediction

This book is intended for use with the *Domestic Animals and Birds* thematic unit. It does not teach everything in the unit; it is only a teacher's aid which *supports* the unit, while preparing the preschool child for reading and teaching him some sight words which will make learning to read faster, easier and more interesting.
